

# SOLAR PANEL 'EZY MOUNT' BRACKETS

## 'EZY' MOUNTING RAIL SYSTEM

*Connecting Through Innovation!*

- 1580MM LENGTHS
- ROBUST ALUMINIUM MATERIAL
- ALLOWS FOR 25MM AIR GAP
- MOUNT PANELS TO SURFACES NEAT & PROFESSIONALLY
- ADAPTABLE TO SUIT ALL SIZE SOLAR PANEL FRAMES
- SUITABLE FOR AUTOMOTIVE & MARINE USE

The KT EZY MOUNT Solar Panel Rail Brackets are ideal for mounting your solar panels to any surface, in a variety of ways to suit your requirements. The EZY MOUNT Rail System is an exclusive KT product entry into the solar market.

Rather than two box channel rails, plus 'L' brackets, bolts and screws, This is a single one piece solution that may be adapted to suit all size solar cell frames. The EZY MOUNT rails can be fastened down or secured with marine grade waterproof 'sikaflex silicon adhesive.

The unique and innovative design allows all important 25mm air gap from the mounting surface allowing ventilation and preventing overheating and water ingress.

KT EZY MOUNT Solar Panel Rail Brackets are available in single and twin packs. The brackets are 1580mm in length however can be easily customised to the required length to suit your solar panel.

The KT EZY MOUNT Solar Panel Bracket is manufactured using an anti-corrosive, robust aluminium extrusion making it suitable for automotive and marine applications where it may be subject to coastal salt water environments.

### Model No:

- KT70750 : Single Rail 1580mm length
- KT70750T: Twin Pack, 1580mm length x 2

### Features:

- 1580mm Lengths
- Adaptable to suit all size solar cell frames
- Suitable for automotive and marine applications
- Manufactured using anti-corrosive, robust aluminium extrusion
- Weight: 700 grams
