

48V ELECTRIC VEHICLE SOLAR CHARGING SYSTEM

Proudly Brought To You By

- IDEAL FOR GOLF CARTS, SERVICE VEHICLES, RESORTS
- ALSO OPERATES ON 36 VOLT SYSTEMS
- PREMIUM QUALITY MPPT SOLAR CONTROLLER
- D.I.Y EASY TO INSTALL 'EZY' RAIL MOUNTING SYSTEM

'Ezy' Bracket Rail system allows spacing between roof and panel for ventilation & cooling

Model No:

KT70777 : 36 & 48V, 160W Electric Vehicle Solar Charging System

- Five accreditation certificates
- Unique 144 Cell / 160 Watt Monocrystalline Solar Panel
- Premium quality MPPT Solar Controller with optional "real time" volts/amps/watts for smartphone app
- "EZY" Mount Panel Mounting Rails
- Fitting Kit: Cable, Circuit Breaker, Connectors, Cable Ties.
- Instruction Manual
- 25 Year efficiency warranty / 3 year warranty on build & manufacture
- Individually barcoded for warranty registration

- Maintains and extends battery life / reduces sulphur buildup
- Renewable Energy Source - do your part for the environment
- No Requirement to change roof, the panel fits directly to your current cart roof.
- Reduce 240 Volt Charging Time & Cost
- Short, Fast Fitting Procedure
- Kit suitable for most major brands

View the performance and efficiency of your KT 48V Electrical Vehicle Solar Charging System with a simple touch of your phone, through the Smartphone Application, available for iPhone and Android.

The Smartphone application allows you to view the Volts, Amps and Watts of your system, giving you a complete status of performance while you are on, or off the course.

The system will report data in all lighting conditions.
